Christopher Nolan - Computer Vision & Deep Learning Engineer

Contact

Email: christopher.nolan@visiontech.ai | Phone: (555) 063-8899 | Location: San Francisco, CA

Summary

Computer Vision Engineer with 4 years experience developing real-time object detection, video analytics, and 3D perception models using OpenCV, PyTorch, YOLO, and TensorRT.

Technical Skills

Computer Vision: OpenCV, PyTorch, YOLOv8, TensorRT, ONNX, C++, Python, CUDA
Domains: Object Tracking, Image Segmentation, Edge AI Deployment, Camera Calibration

Work Experience

Computer Vision Engineer - VisionScale AI (2022 - Present)
- Developed real-time object tracking algorithms in C++ and OpenCV deployed on embedded camera nodes.
- Optimized PyTorch YOLO models using TensorRT for 60 FPS video processing.

AI Engineer - Autonomous Labs (2020 - 2022)
- Trained image segmentation models for autonomous vehicle perception pipelines.

Education

M.S. in Computer Vision - Carnegie Mellon University
