Dr. Hannah Abbott - AI Research Scientist

Contact

Email: hannah.abbott@airesearch.org | Phone: (555) 024-5566 | Location: Cambridge, MA

Summary

Ph.D. AI Research Scientist specializing in Transformer architecture, LLM pretraining, RLHF (Reinforcement Learning from Human Feedback), and parameter-efficient fine-tuning (LoRA, QLoRA).

Skills

Deep Learning: PyTorch, HuggingFace, DeepSpeed, Megatron-LM, JAX
Concepts: Transformer Attention, LLM Pretraining, RLHF, LoRA, Alignment, Evaluation Metrics
Languages: Python, C++, LaTeX

Research & Work Experience

Staff Research Scientist - OpenAI Labs (2022 - Present)
- Co-authored 4 top-tier conference papers (NeurIPS, ICML) on parameter-efficient LLM fine-tuning.
- Optimized distributed PyTorch training across 256 GPU clusters using DeepSpeed.

AI Researcher - MIT CSAIL (2018 - 2022)
- Researched novel attention mechanisms reducing memory complexity in long-context models.

Education

Ph.D. in Computer Science (Artificial Intelligence) - MIT
B.S. in Applied Math - Harvard University
