Kevin Zhang - High-Performance Systems Engineer

Contact

Email: kevin.zhang@systems.dev | Phone: (555) 027-8899 | Location: Chicago, IL

Summary

Systems Software Engineer with 6 years experience writing ultra-low latency, concurrent, memory-safe network applications in Rust, C++, and Linux kernel programming.

Technical Skills

Languages: Rust, C++17/20, C, Go, Assembly, POSIX
Systems Concepts: Multithreading, Lock-free Data Structures, Async I/O (tokio, io_uring), gRPC, Memory Management
Tools: GDB, Valgrind, Perf, Git, Linux

Work Experience

Senior Systems Engineer - HighFrequency Tech (2021 - Present)
- Built Rust microservices processing order book events in under 5 microseconds.
- Optimized memory allocations in C++ trade execution engine using custom lock-free queues.

Systems Developer - InfraCore (2018 - 2021)
- Developed async network proxies and load balancers using Rust Tokio.

Education

B.S. in Computer Engineering - University of Michigan
