Quinn Taylor - Embedded Systems & IoT Firmware Engineer

Contact

Email: quinn.taylor@embedded.dev | Phone: (555) 033-5566 | Location: Phoenix, AZ

Summary

Embedded Software Engineer with 6 years experience writing real-time C/C++ firmware for ARM Cortex microcontrollers, FreeRTOS, ESP32, and IoT wireless protocols.

Technical Skills

Languages: C, Embedded C++, Python, Assembly
RTOS & Microcontrollers: FreeRTOS, ARM Cortex-M, ESP32, STM32, Nordic nRF52
Protocols: BLE, Wi-Fi, MQTT, I2C, SPI, UART, CAN bus
Hardware Tools: Oscilloscopes, Logic Analyzers, JTAG, KiCad

Work Experience

Senior Firmware Engineer - IoT Tech Devices (2021 - Present)
- Developed FreeRTOS C++ firmware for battery-powered BLE environmental sensors.
- Reduced deep-sleep power consumption by 50%, extending battery life to 3 years.

Embedded Software Engineer - SensorNet (2018 - 2021)
- Programmed STM32 microcontrollers using C and HAL drivers for automotive CAN communication.

Education

B.S. in Electrical & Computer Engineering - Arizona State University
